VERBUMFLOW · BRAND GUIDELINES · V1.0

Brand guidelines

The short version: a V, a tilde, coral and blue, and a friendly humanist sans.
This doc keeps every surface on-system.

01 · LOGO

The mark

Our primary mark is a humanist **V** crossed by a horizontal tilde ribbon. The tilde splits exactly at the V's apex — **coral on the left, electric blue on the right** — encoding the core idea of VerbumFlow: a verb in motion, transforming across persons and tenses.

02 · CLEAR SPACE & MINIMUM SIZE

Give it room to breathe

Maintain clear space equal to **½ the height of the V** on every side. The mark should never appear smaller than 20px tall in digital contexts, or 8mm in print.

03 · COLOR PALETTE

Palette

Electric Blue and Coral are the signature pair — one structural, one expressive. Blue leads the UI, Coral punctuates. Ink and Paper carry the frame; Blue Deep and Coral Soft are reserved for depth and states.

Electric Blue · primary

Core brand color. Primary buttons, active states, headers, the right half of the tilde ribbon.

Coral · accent

High-contrast accent. Streaks, wins, progress, the left half of the tilde. Use sparingly — a punctuation mark, not a background.

Ink & Paper · neutral

Ink for body text on light; Paper for page surfaces. Avoid pure #000 / #FFF — the warm ink feels less sterile.

04 · TYPOGRAPHY

Type system

Plus Jakarta Sans is our primary typeface — humanist, friendly, and bilingual-safe.
JetBrains Mono handles conjugation tables, timers, codes and captions.

05 · APP & WEB ICON

Icon system

The icon is the mark alone, centered on a solid tile with a generous corner radius. Four approved tile colors. iOS uses a squircle mask; Android adaptive icons use a 108×108 canvas with 66×66 safe zone.

06 · DOS & DON'TS

Usage rules

A small number of firm rules keeps the mark recognizable across every surface.

● DO

Use the coral → blue split at the V apex. Center must land on the vertex.

● DO

On dark or photo backgrounds use the reversed single-color mark.

● DON'T

Don't shift the split off-center. It must sit exactly at the V apex.

● DON'T

Don't rotate, skew, or add effects (shadows, outlines, glows) to the mark.

07 · VOICE

Voice & tone

Warm, precise, a little playful. Bilingual by default. Never condescending about mistakes — they're the whole point.

WE SOUND LIKE

"Nice streak. Ready for the subjonctif today, or want to warm up on présent first?"

WE DON'T SOUND LIKE

~~"Incorrect! Please review the rules for subjunctive mood conjugation before attempting again."~~
